

Simplify your video workflow

All the tools your organization needs to on-board, manage, and deliver video seamlessly, in one platform.

Encryption & DRM

Lock down viewers based on IP, domain, geographic location, website or other conditions

Single Sign On (SSO)

All major SSO providers are supported

StreamShark is the trusted video platform that helps the smartest enterprises scale their communication. Built on a foundation of security and redundancy at every stage.

At StreamShark we are trusted by Fortune 500 and high growth companies to deliver confidential corporate streams globally, at any scale.

Our customers use StreamShark daily for:

- Town halls, all hands and company meetings
- Q&A sessions
- Product launches
- Training sessions for employees across teams and geographies
- Any content requiring some form of digital rights management, e.g. geographical restrictions, SSO access control lists

Key Features

- **Live Streaming** - Deliver live streams to audiences worldwide at any scale with our powerful platform
- **Video on Demand** - Offer high-quality VOD, accessible anytime, anywhere, on any device
- **Video CMS** - Create branded channels to organize and showcase your video content
- **Live Schedules** - Simulate live streams with VOD content and schedule broadcasts across time zones for global reach
- **Encoder Management** - Remotely configure and control your AWS Elemental or Epiphan Pearl family of encoders
- **AI Captions, Translations & Voice Dubbing** - Ensure your content is accessible to all with auto-generated captions, translations and multilingual voice dubbing for your live streams and VOD
- **Automated Metadata Generation with Shark AI: Scribe** - Eliminate manual data entry by automating metadata creation. Scribe intelligently populates your VOD library with accurate titles, descriptions, chapter markers, and metadata tags
- **Single Sign On (SSO)** - Limit access to the StreamShark portal and the video player using your SSO provider and access groups
- **Detailed Analytics & Insights** - Understanding viewer engagement is crucial, which is why our analytics suite provides deep insights, including CMCD for precise streaming metrics and QoE tracking

Multistreaming

Easily multistream to Facebook, YouTube, LinkedIn and more

180/360° Streaming

Stream to all the latest VR and AR headsets

Key Features (continued)

- **Future Ready** - Embrace the future with immersive VR, AR, MR & 6K video support for live and VOD
- **Hollywood Level DRM** - Support for the highest level DRM used by Hollywood studios to encrypt their content
- **Low Latency Streaming** - Deliver smooth, real-time streaming experiences with our low latency support, ensuring minimal delay for enhanced audience interaction and engagement
- **Privacy Profiles** - Take full control of your content by restricting access based on viewer IP, geographical location, SSO groups, and more
- **Slack Integration** - Our Slack integration notifies your team about new content and alerts stream operators on stream performance, ensuring they stay updated in real time
- **Multi-CDN** - We combine multiple CDNs into a single network, providing flawless playback and reliability
- **Zoom API Integration** - Create Zoom meetings and scale them organization-wide with the StreamShark Event Platform
- **eCDN Delivery** - Reduce bandwidth load on your corporate network by sharing live stream content between viewers on your internal network
- **Live Chat, Polling, Q&A** - Allow viewers to ask the presenter questions or chat with other viewers. Our chat can be fully integrated with SSO and is fully encrypted.
- **Multistream to Social** - Broadcast a single stream and have it rebroadcast to multiple other streaming destinations (e.g. Facebook, YouTube, LinkedIn etc) simultaneously
- **Sub Users & Audit Trails** - Grant additional users access to your StreamShark account. See every action taken by authorized users within the StreamShark portal.
- **Instant Video Archives** - Generate a top and tailed archive of your live stream within seconds of completion. Create video clips of key sections of your live stream.
